The majority of CAFOD's charitable work is carried out by making grants to partner organisations.

Grants are made within long term strategies agreed with our partners, with grants for international development programmes often made on a three-year basis. Before individual grants are made, project proposals are subject to a formal assessment and approval. All projects are systematically monitored for the duration of their existence, and major projects are subject to a final evaluation review.

During the year CAFOD made a total of 571 grants with a total value of £31.3m – an increase of almost £4m on grant spending in 2015. This met CAFOD's objective of growing the resources allocated to partners to almost 55% of CAFOD's total spend.
