

Dear Prime Minister,

The transition to net zero must start now. Achieving net zero emissions will limit the worst effects of climate change on our health, homes and communities and people living in poverty around the world. Will you act quickly to ensure:

- All government departments urgently bring forward policies to achieve net zero emissions. And go further, faster to achieve net zero emissions honestly, transparently and without caveats by 2045.
- UK investment overseas and at home is consistent with keeping global temperature rise below 1.5 degrees. This should include stopping all new public support for fossil fuels overseas.
- The UK shows leadership by connecting the crises of poverty, environmental degradation and climate change and makes concrete commitments to combat them at key international events.
